FALL INTO A GOOD BOOK

Saturday, August 11, 2018 is a day we here at the Caldwell Public Library will never forget. Flood waters rushed down the ramp to the Children's Room and rose to the top of the door and windows. Luckily, no one was injured. Almost all of the furniture was lost in the Children's Room and staff areas. Hundreds of books were destroyed. As we work to slowly rebuild the lower level, the staff and I are committed to providing the best possible service to the community. All programs listed in this newsletter will take place in the upper level meeting room. As always, any materials we don't currently have available can be ordered and received in a few days. Our digital collection is always available online and is growing each month.

I want to thank the community for its outpouring of support during this trying time. We are currently unable to take book donations, but donations to the Caldwell Public Library Foundation will be used to enhance our Children's collection and programs when the Children's Room reopens to the public. We hope to be back to normal operations soon.

Theremin presentation w/Kip Rosser

Thursday, Oct. 25, 6:30PM

Ever wonder what instrument produced that eerie music in vintage Sci-Fi movies? It's the Theremin, the grandfather of all electronic instruments, invented in 1919 by a Soviet scientist named Leon Theremin. To this day, it's the only instrument in the world that's played without being touched. For over twenty years, Kip Rosser's solo performances, staged productions, award-winning compositions, educational programs and industry recognition have earned him a reputation as one of the most accomplished thereminists in the world. Rosser blends music, history, stories, performance art and audience participation. His special brand of performance, which has been called "stand up musicianship" brings magical sights, sounds and laughter to people of all ages.

History of Essex County Overbrook Hospital

Saturday, Oct. 27, 2:00PM
